

MAXIME FERRER

JUNIOR WEB DEVELOPER

After 4 years of experience in marketing and project management, I decided to retrain in web development.

I recently graduated from my course at OpenClassrooms where I learned the basics of web development, front-end with React and back-end with NodeJS. I continue my learning by self-training on NextJS, Tailwind and Typescript.

I am currently looking for a first job as a developer to continue to evolve in this new path that I am passionate about.
